

# Beezy code challenge

CSS Developer position

## Introduction

The purpose of this assignment is to evaluate how you develop and organize code, as well as check your eye for detail (pixel perfect).

The code should be production-like code, so please write clean, maintainable and performant code. It is important that you avoid the use of frameworks. You are free to attach a document if you want to justify your technical decisions or simply want to add any remarks/ comments.

It is **mandatory** that the test is compatible with the latest Chrome version, IE11 and Edge.

You can find the assets in the file attached with this document and using Zeplin tool you will have all needed information:

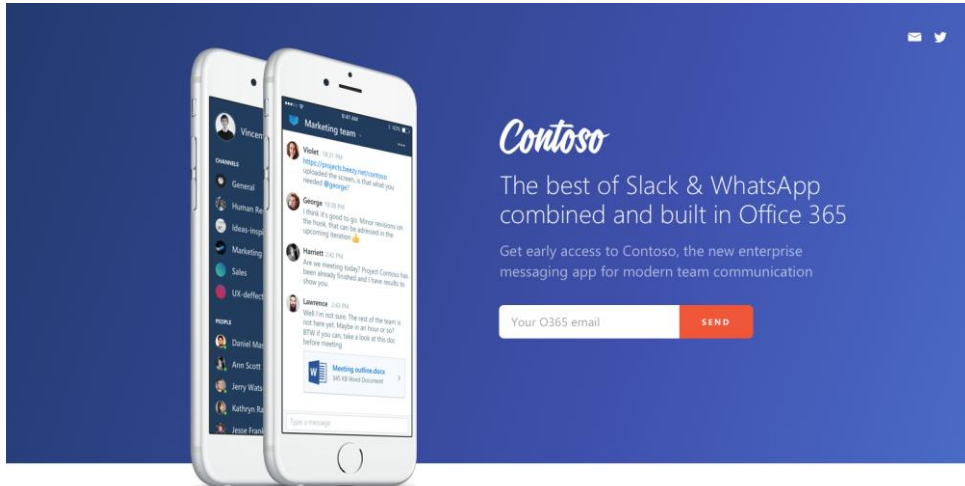

**URL:** <https://app.zeplin.io/projects.html>

**User:** fecandidates

**Password:** candidate1

## Test

Provide the HTML & CSS code in order to generate the page below.

It should be responsive as shown below:
